THE BLUE BLADE

Less than half the weight.

At least three to four times longer between sharpenings.

A heat-treated stainless steel edge bonded to an aluminum body, made in a wide variety of sizes.

LIGHTER ON YOUR CREW. EASIER ON YOUR BUDGET.

23 lb

77 inch blade, against 55 lb standard

84 inch: 25 lb against 65 lb. The stainless edge resists rust.

4 to 6 weeks

between sharpenings for most rinks, customers report

50 to 80 cutting hours, against about weekly for a standard blade per the machine makers' own manuals.

2

blades per machine, rinks report

One on the ice, one in reserve. Rinks report keeping four to six standard blades in rotation, and more when the shop runs slow.

Over 40 rinks run the Blue Blade.

> "Blue Blade has been outstanding for our rink. Cutting the ice is noticeably easier, the blade quality is superb, and we don't have to change them as often. Our entire ice crew loves them. Highly recommend."
>
> Unedited Google review, September 2026.

Tell us your machine.

Call or email us. We confirm the fit, and it ships pre-sharpened.
